The Pension Plan benefit is determined by multiplying the Special Risk rate of 3.0%\* times the years of FRS service times the average of the employee's highest paid eight (8) years\* of salary. The Investment Plan benefit is based on the performance of selected funds over time. Employees in the Pension Plan are vested after eight (8) years of service; vesting is after one (1) year of service for the Investment Plan. Normal Retirement for the Pension Plan is age 55 with 8 years\* of Special Risk service, or 25 years of Special Risk service regardless of age. Early Retirement is any member who is vested, who has not yet met normal retirement age or date. (There is a penalty of 5% for each year the retirement date precedes the normal retirement age.) There is no age or service requirement that must be met to receive a benefit under the Investment Plan, provided the one (1) year vesting requirement has been met.
